

BPA Platform for SAP Business One Data Sheet

What is it?

Codeless Platforms' BPA Platform (formerly TaskCentre) has been SAP certified since 2011, enabling SAP Business One users to integrate SAP Business One with other business systems and services. Automation can be applied to multiple business processes, such as order management, inventory and pricing updates etc., and notification and alerting capabilities can also be added.

Depending on what you want to achieve, most processes you define are achieved in a 100% 'code-free' experience. However, scripting can be called upon where standard functionality is unable to achieve a given solution. You automate an employee process by dragging and dropping icons onto a canvas and linking them together in a process flow. The correlation of these tools replicate the physical employee process to your exact business rules.

The benefits of BPA Platform for SAP Business One

This proven and cost-effective solution can be rolled out in less than a day, and will immediately help you improve a wide-range of business processes:

- Improve efficiencies and employee productivity
- Reduce costs and increase profitability
- Improve decision making and company performance
- Eradicate human error and reduce exposure to financial risk

"The flexibility of BPA Platform is remarkable. The things that you can do with it are out of this world. It never ceases to amaze me. It's an incredibly efficient and powerful tool. I always equate BPA Platform to being a staff member that never sleeps. It's like an incredibly efficient person, or team of people, checking data, that never stops." – Malcolm MacLean, Global Head of IT, Graff Diamonds

Key features complementing SAP Business One

BPA Platform is comprised of four capabilities, enabling businesses to achieve more with the systems they have in place.

Notifications & Alerts

Automate communications with customers, partners and suppliers.

Examples: Aged debtor updates, back orders now in stock, KPI notifications, price change updates, order confirmations and delivery notifications.

Report & Document Automation

Code free automation of business processes that cross SAP Business One and practically any other business application.

Examples: Credit control letters, renewal documents, compliance documents, delivery notes, sales and stock reports.

Data Integration & Synchronisation

Code free integration with hundreds of applications, web services and systems.

Examples: Integrating CRM solutions, eCommerce software, WMS applications, EDI solutions, courier services and payment systems.

Workflow & Human Interaction

Code free authorisation workflows that can start and end inside or outside of SAP Business One.

Examples: Purchase order authorisations, credit limit reviews, price changes, discount authorisations and expense approvals.

BPA Platform for SAP Business One Data Sheet

SAP Business One integration connectors

BPA Platform can connect practically any data source via **ODBC**, **OLEDB**, **Web Services** or an extensive range of supported **3rd-party APIs** through **connectors**. Just a few of the software vendors we work with include SAP, Sage, Microsoft, Infor, Epicor, Salesforce, Magento and MailChimp. For a more comprehensive list as well as industry specific solutions please visit www.codelessplatforms.com

We also provide a number of templated SAP Business One solutions for SAP Concur, Magento, Shopify and WooCommerce.

What system requirements do I need to implement the solution?

BPA Platform is Windows-based software, utilising a true three-tier client server model over TCP/IP, with a multi-threaded server running as a Windows Service. It can run in 32-bit and 64-bit environments, and can communicate with both 32- and 64-bit external systems. The **Client** provides all administrative and Task design capabilities, while the **Server** provides the client connectivity and manages the processing of Tasks.

Supported SAP Business One versions

8.82 – SQL Server	9.1 – SQL Server & HANA	9.3 – SQL Server & HANA
9.0 – SQL Server	9.2 – SQL Server & HANA	10 – SQL Server & HANA

Supported operating systems

- Microsoft Windows Server 2016
- Microsoft Windows Server 2019
- Microsoft Windows Server 2022

Supported hardware (Min Spec)

- Dual 2Ghz processor cores
- 4 GB of available memory
- 1.5 GB available disk space
- 1280x1024 desktop
