# Sign4it

The Real-Time Proof of Delivery App

Sign4it streamlines the delivery process with a real-time mobile proof of delivery solution fully integrated with SAP S/4HANA Cloud.
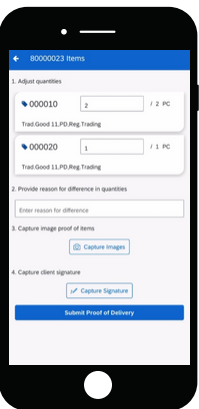

Customers formally accept delivery in an auditable, undisputable manner thereby reducing payment disputes, triggering accurate invoicing for the goods accepted, improving working capital, and ensuring compliance with revenue recognition standards.

Step 1
Driver accesses list of daily deliveries.

Step 2
Additional deliveries may be loaded via barcode scanning.

Step 3
Quantities received are captured with reasons for over/under delivery and photographic evidence of damaged goods/discrepancies.

Step 4
Accurate billing is triggered in SAP based on the confirmed quantities.

- Supports compliance with IFRS revenue recognition standards

- Reduction in payment disputes and improved working capital by means of proof of customer signature

- Improved customer satisfaction by minimising credit notes and providing real-time feedback and images for damaged goods

- Reduction in day's sales outstanding with accurate, real-time invoice trigger in ECC or SAP S/4HANA

- Increased accuracy with embedded barcode scanning

G3G and EPI-USE Labs, both members of groupelephant.com, collaborate closely to provide comprehensive end-to-end services to our SAP® clients. With over forty years of combined expertise, our partnership delivers innovative solutions tailored to meet the evolving needs of clients across diverse industries worldwide.

Together, we offer a unique blend of expertise, experience, and innovation to drive business growth and transformation. Visit g3g.com and epiuselabs.com to learn more about our collaborative services and solutions, and discover how we can modernise your SAP landscape.
